## Full Stack & BlockChain

### CONTACT

**Address** 8 Chome-2-2 Minami 6 Jonishi, Chuo Ward, Sapporo, Hokkaido 064-0701

**Location** Japan

**Email** Paladin0742x@gmail.com

**Phone** +81 11-215-0533

**Github** <https://github.com/hattori224>

### EDUCATION

Bachelor's degree Computer Science  
University of Tokyo 2010-2014

### SKILLS

#### Frontend

React.js, Vue.js, Angular, React Native, Typescript, HTML5, SCSS, Material UI, Tailwind CSS, JQuery, Webpack, ES7, Bash Script

#### Backend

Node.js, Python, PHP, C#, Java, NgRx, Ruby on Rails, AWS APIs, Google API, Socket.IO, Ag-Grid, Slack API, Stripe, Form

#### Database

MySQL, MongoDB, Redis service, Oracle, PostgreSQL, AWS DynamoDB, AWS S3, No SQL

#### Framework

Next, Nuxt, Express.js, Hapi.js, .Net MVC, Flask, Django, Yii2, Laravel, Spring, WP, Symphony

#### Blockchain

Solidity, Ethereum, Web3.js, Truffle, Hardhat, C/C++, Docker, IPFS, Ether.js, Ganache, Rust, Solana, GoLang

#### Platforms

AWS Lambda, Amazon Web Service, Firebase

### PROFILE

I am a senior full-stack & blockchain developer who worked at HASHPLAY executing subsystem interactions for the VR delivery system. I have also been developing slick web and mobile solutions for over half a decade, during which I have constructed some cutting-edge robust software, all customized to suit his clients' unique needs. I have experience of leading teams of several sizes as project manager or team master. I communicate well and has worked in teams of all sizes.

### EXPERIENCE

#### Senior Blockchain Developer | 09/2020 to Now

##### YAMAGATA, Hokkaido, Japan

- Have performed Smart Contracts using Solidity to automatically manage uploaded base64-based data sets in the platform and built 50+ smart contract.
- Generated professional REST APIs for the dashboard and admin portal.
- Have deployed the project on the production/staging environment by leveraging services like Elastic Beanstalk and Route 53 on AWS.
- Lead Contract and backend team as team master in 4 projects

#### Senior Software Engineer | 06/2016 to 08/2020

##### WEARE4C, Toronto, Canada

- Developed 7 frontend and backend applications written in Nuxt.
- Worked on 10+ smart contract written Solidity.
- Collaborated with 30+ colleagues in local and remote locations.
- Lead team as project manager in 6 projects

#### Senior Full Stack Developer | 08/2015 to 05/2016

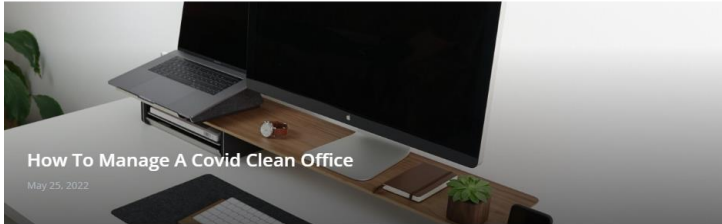

##### NETCOTECH, Edmonton, Canada

- Troubleshooted 2,000+ code-related issues and defects.
- Produced detailed project design, unit test plans, and documented code for 50+ clients.
- Practiced server deploy and version control for 20+ projects across 4 teams.
- Attended in a lots of meetings to receive tasks and instruction for weekly goals.

# Robin Fukuda

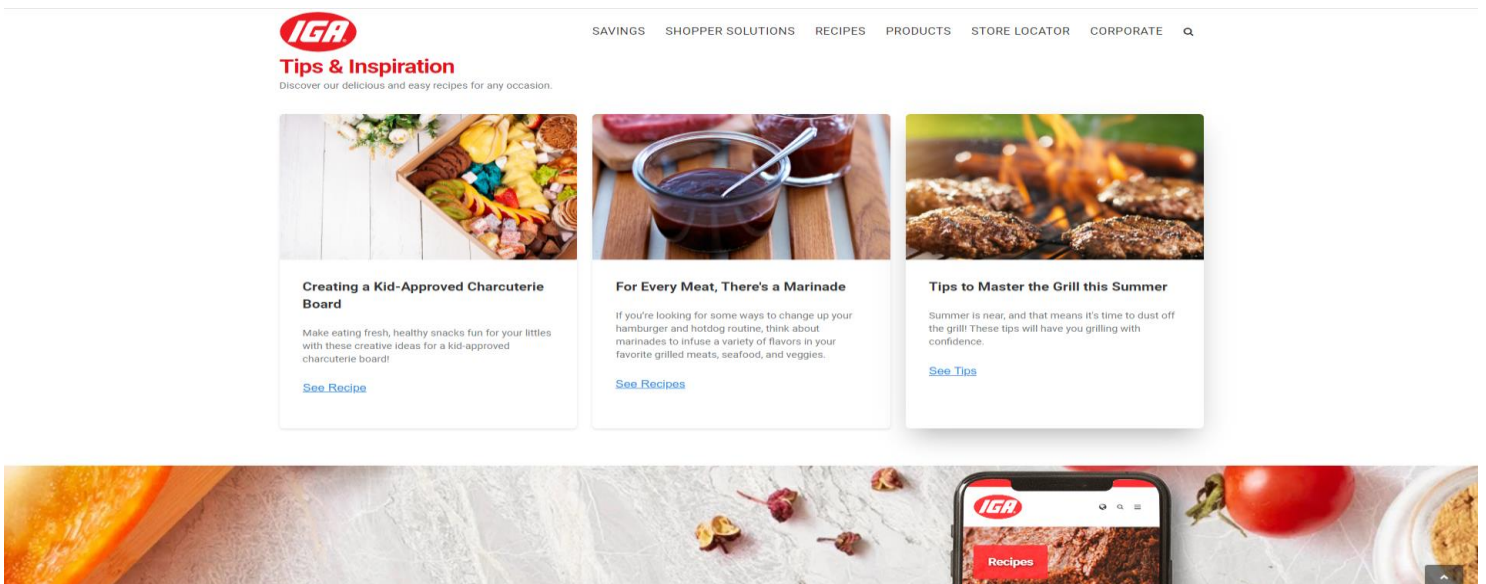

## 1. Employment Site(<https://ablemployment.com>)

STAY INFORMED WITH THE ABL BLOG

- combined 3 projects written in PHP.
- Developed 5 front-end applications written in React.
- wrote and executed 200+ unit tests using Jest.
- Collaborated with 30+ colleagues in local and remote locations.
- Lead front-end team as senior developer in 6 projects

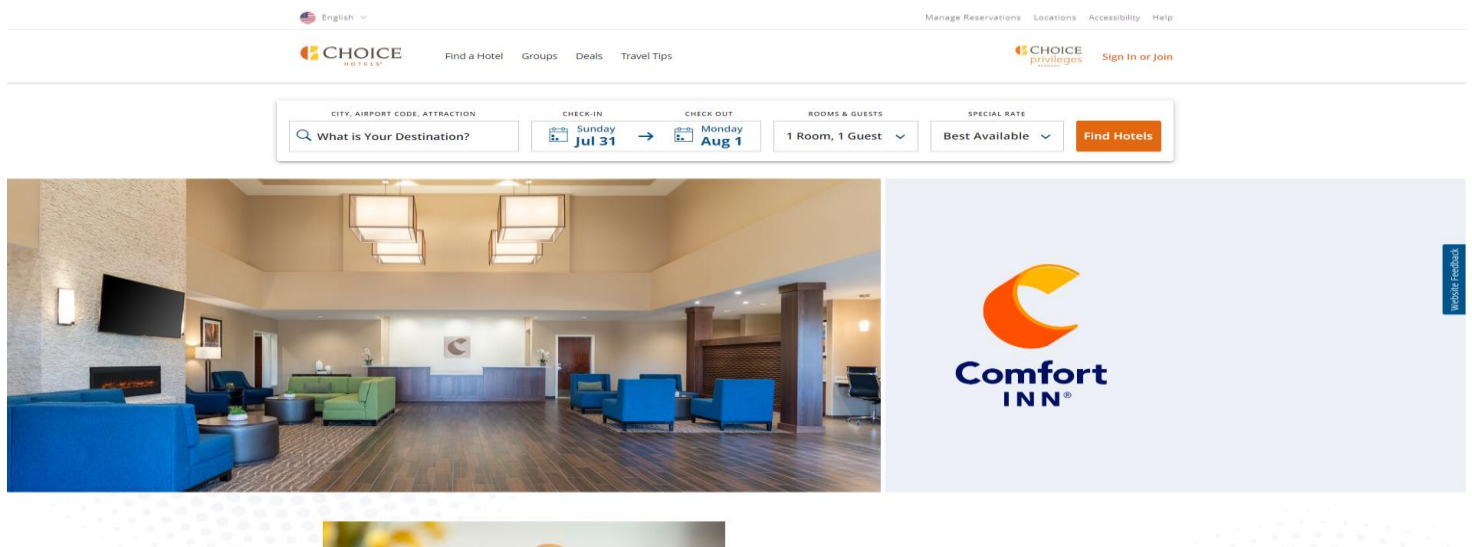

## 2. Food Service Site(<https://www.iga.com>)

- Troubleshooted 2,000+ code-related issues and defects.
- Produced detailed design documentation, unit test plans, and documented code for 50+ clients.
- Practiced strong configuration management and version control for 20+ projects across 4 teams.
- Attended 100+ weekly stand-up meetings to receive tasks and instruction for weekly goals.
- Lead team as team master in 6 projects

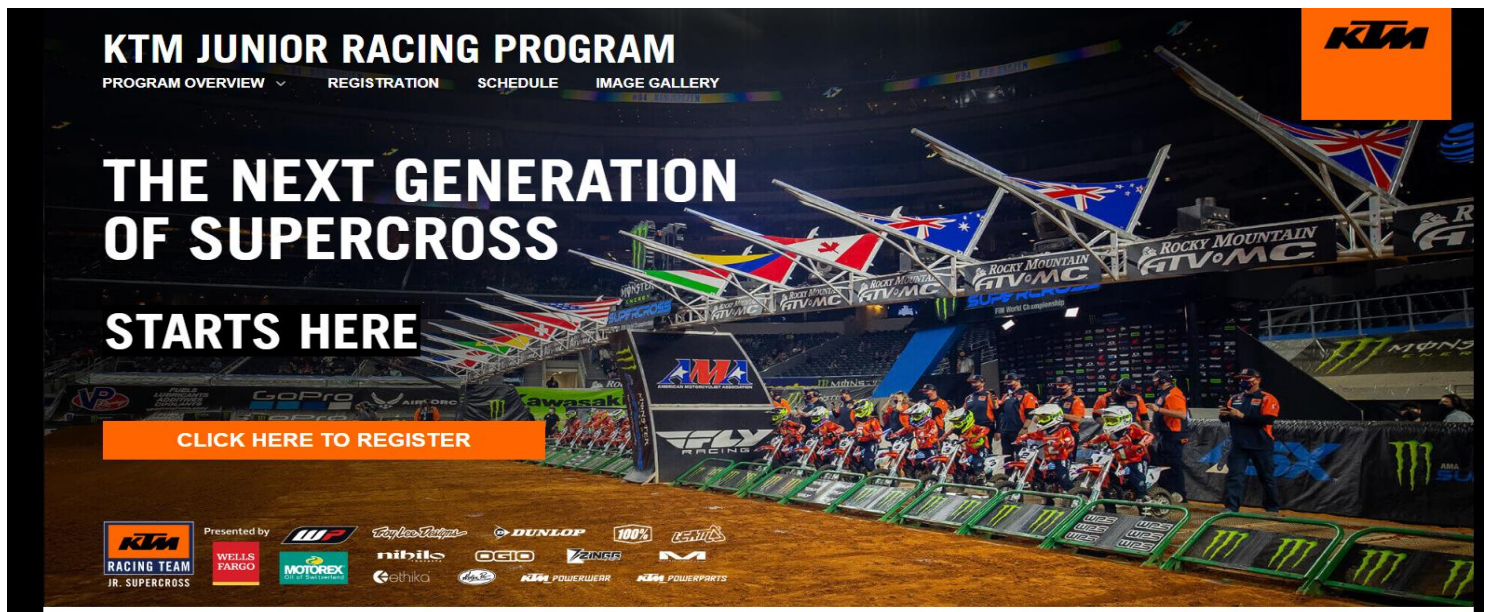

# Robin Fukuda

## 3. Hotel Service Site(<https://choicehotels.com>)

In this project, I have worked as a frontend engineer. Here, I have designed frontend by using react.js and Figma and implemented some search engine module by using node.js/express.js. I got the basic knowledge and experience of search engine module in this project. In this project, I lead the team as Senior developer.

## 4. KTM JUNIOR RACING PROGRAM(<https://ktmjrsx.com/>)

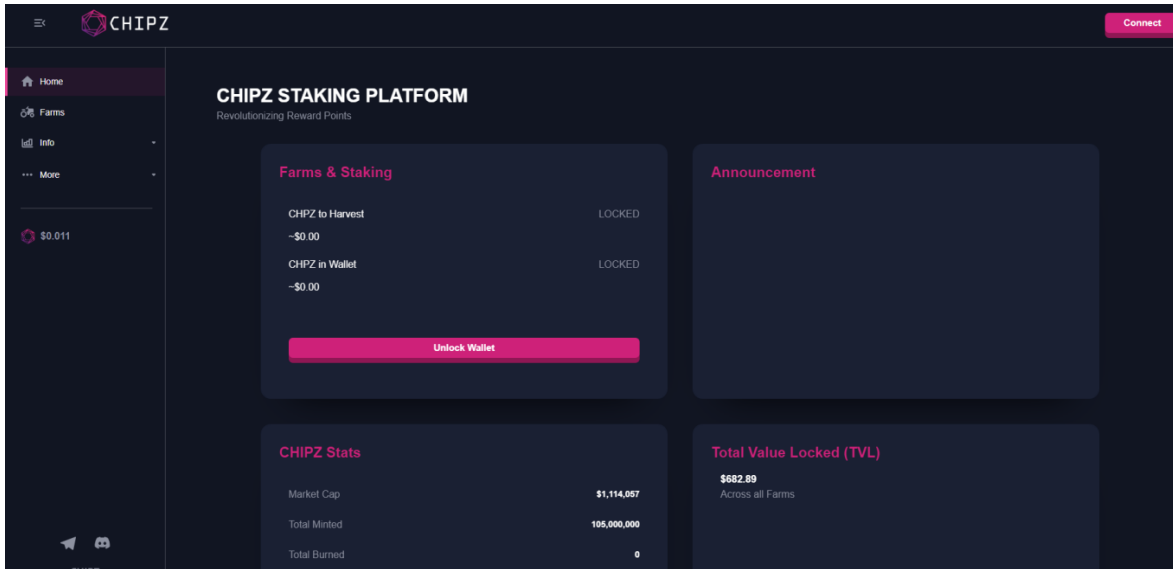

- composed a responsive web app using Nuxt that support consulting service.
- connected Amazon AWS S3 Bucket and connected to Mongo Atlas database.
- Built users management interface.
- I managed the team in this project.

# Robin Fukuda

## 5. CHIPZ Staking(<https://lp.chipz.io>)

- Wrote smart contract using Solidity and implement integration using React/Web3.js.
- Implemented master contract
- executed Frontend and Integration
- Build CHIPZ token
- Lead the team as team master

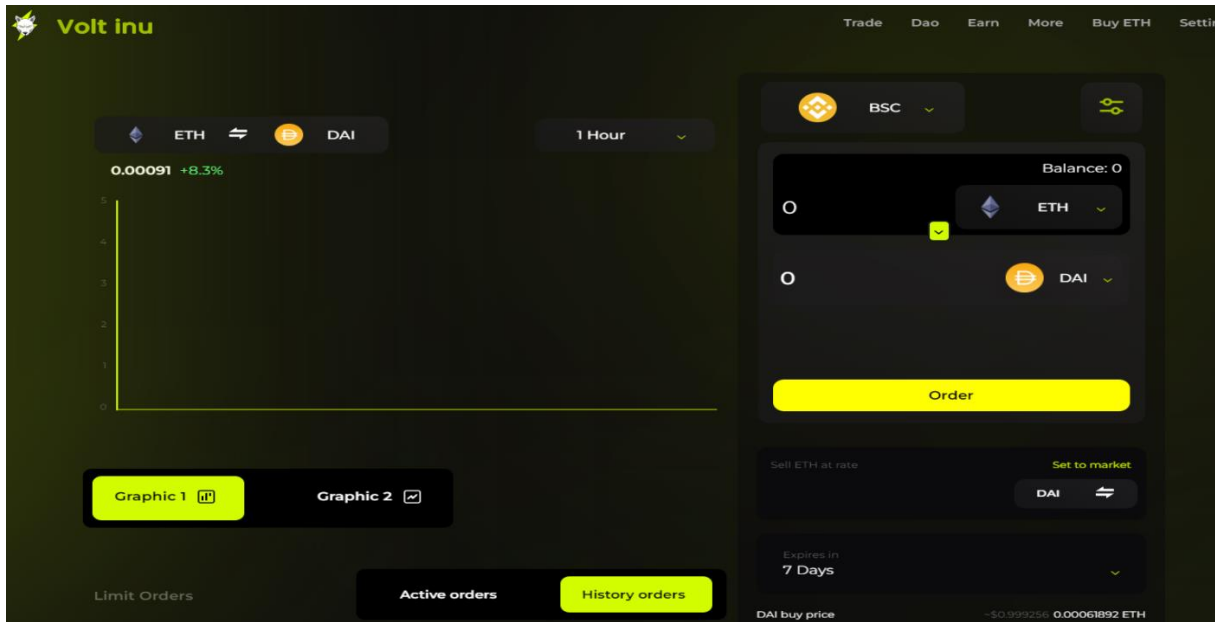

## 6. VOLTED NFT MINT

- Made frontend using React and web3.js & ethers.js.
- Running of NFT mint & presale smart contract.
- Development of application APIs for the client-side to facilitate the blockchain interaction.
- Implement of Chain link Randomness (fisher shuffle)

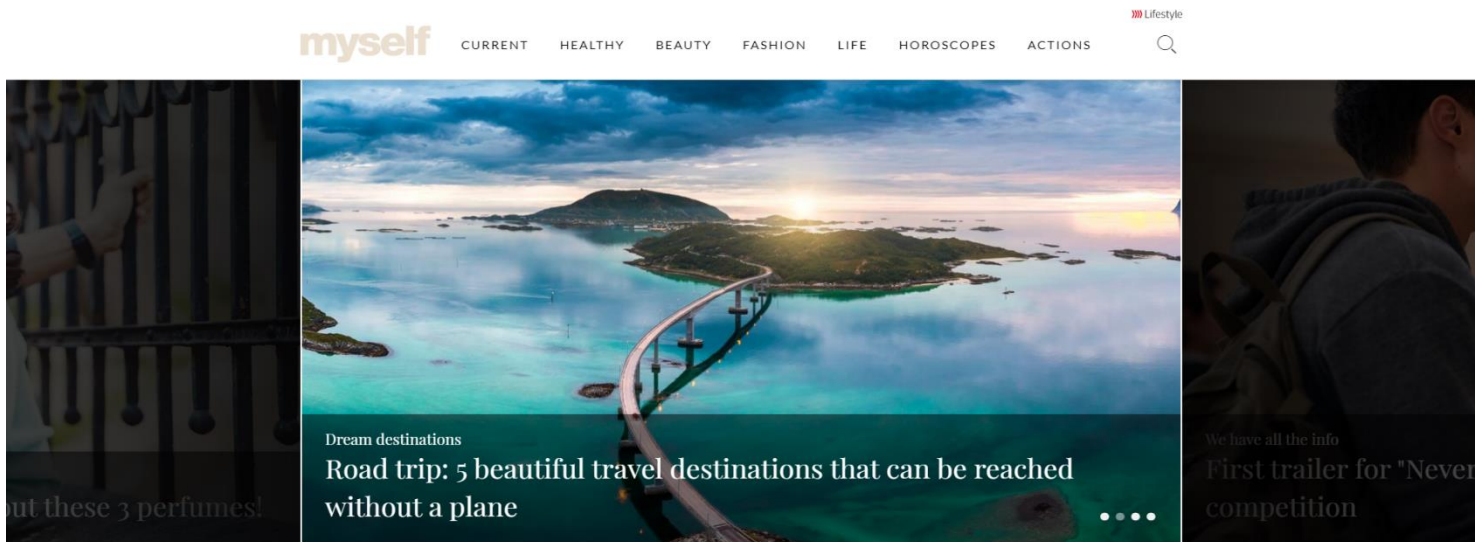

# Robin Fukuda

## 7. VOLT INU SWAP

- Built contract for normal swap, limit order swap and p2p swap
- Connected backend for limit order and p2p swap
- Performed frontend and Implement frontend integration.

## 8. Healthy Sports Site(<https://myself.de>)

- Implemented frontend of Healthy, Beauty, Fashion, Life page and so on with React.js
- Combined backend of them with Laravel
- Added cronjob service for schedule email message
- Lead the team as Senior Full stack developer
